

SAFETY RAIL BRACKET

HORIZ. FORMING & SHORING

Safety Guardrail Post

A strong clamp-on post opens wide and tightens quickly on slabs of any thickness from 0"-29", allowing for application to practically any project. Simple to install with a standing height wrench actuated top adjusting wing nut.

Galvanized for durability, the it is designed to withstand the toughest handling. The captive inner member extends to 29", preventing bottom piece from falling out.
